Solutions that Underline Elegance in the Living Space

According to nowadays trend, aesthetic and elegant look of the living space is achieved with the help of appropriate high quality illumination system that creates illusion of the “natural touch” of the furniture.

This is how SAMET Lighting Systems were designed, with the purpose to attain this harmonious and cozy look, which arouses sensation of comfort and peace.

With its vast range of Lighting Products SAMET practically “Illuminates” Interior Design World with developing Lighting Components varying depending on furniture design, material and its suitable color of the light.

Internal Cabinet Spot

Internal Cabinet Spot

Products created with individual approach

Being in tune with modern trend, SAMET Lighting Systems were developed with touch, switch and sensor control options in order to create customized solutions matching specific design, and user's utilization habit. This individual approach enhances uniqueness of furniture in the Interior and some of the examples are:

- Depending on the surface of the furniture, SAMET developed mounted or recess mounted lighting components.
- White, daylight and blue lighting product colors with different shades and saturation degrees.
- With such light beam angle as (30°, 60°, 120°) determining the lighting space and practical applicability.

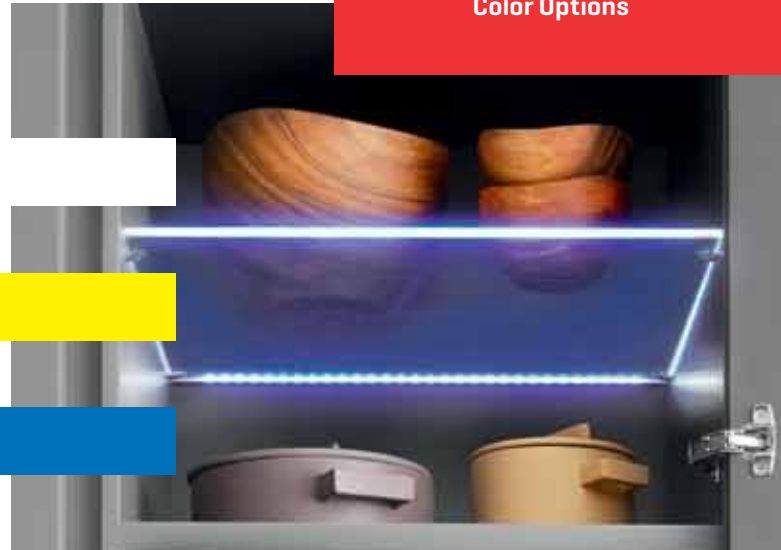

Light of SAMET Lighting Systems combines elegance and comfort into furniture: from the internal systems to shelves, cabinets to modular designs. Generating a feeling more spacious effect, the furniture provides users with a cozy feeling and bright experience.
